

# MarkView

---

MarkView is a sleek, GTK-based Markdown viewer that provides real-time rendering and syntax highlighting.

## Features

---

- Real-time Markdown rendering
- Syntax highlighting for Markdown input
- Split-pane interface for easy editing and previewing
- Modern, native GTK4 design
- Simple, intuitive user interface

## Prerequisites

---

- Rust and Cargo
- GTK4 development libraries

## Installation

---

1. Clone the repository:

```
git clone https://github.com/v8v88v8v88/markview.git
cd markview
```

2. Build and run:

```
cargo run
```

## Dependencies

---

- [gtk4](#) (0.9)
- [gio](#) (0.19)
- [glib](#) (0.19)
- [sourceview5](#) (0.9)
- [pulldown-cmark](#) (0.10)

## Usage

---

1. Launch MarkView
2. Type Markdown in the left pane
3. View rendered output in real-time on the right pane
4. Use the hamburger menu for additional options

## Contributing

---

Contributions are welcome! Submit a Pull Request.
